DETAILED ACTION

1. This Office action is responsive to the following communication: Request for Continued Examination filed on 22 May 2007.
2. Claims 26-46, 48-54, and 56-73 are pending and present for examination. Claims 26, 54, 63, 64, 69, and 73 are in independent form.

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 May 2007 has been entered.

Response to Amendment

4. Claims 26, 54, 63, 64, 69, and 73 have been amended.
5. Claims 47 and 55 have been cancelled.
6. No claims have been added.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
8. **Claims 26-46, 48-54, and 56-73** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that

Art Unit: 2161

the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 26, 54, 63, 64, 69, and 73 recite the method step of "backing up an original data store by intercepting all write commands that are directed to the original data store during a time interval." The aforementioned limitation constitutes new matter and fails to comply with the written description requirement since the invention as disclosed fails to describe a method wherein all write commands are intercepted. That is, wherein write commands are intercepted (i.e. stopped by another party), the original data store would not receive said write commands.

Accordingly, for the purposes of this examination, prior art will not be applied.
